DE Das Tubecord ist eine röhrenförmige Schnur, auch Tricotin genannt. Mit Hilfe eines Drahtes, welcher in das Innere der Schnur eingeführt wird, kann sie nach Belieben geformt werden, um Schriftzüge und Dekorationen herzustellen. Für kleine und filigrane Figuren eignet sich der 1mm Draht, für größere und stabilere Formen und Schriften eignet sich der 2mm Draht.
IT Il tubecord é un cordoncino tubolare chiamato anche Tricotin. Inserendo un filo metallico al suo interno, può essere modellato a piacere per creare scritte e decorazioni. Per le figure più piccole e dettagliate è adatto il filo da 1 mm (art. 6011-601), mentre per le forme più grandi e per le scritte consigliamo il filo da 2 mm (art. 6011-611).
EN The Tubecord is a tubular cord also called Tricotin. By inserting a wire into it, it can be shaped as desired to create lettering and decorations. For small and fine shapes the 1mm wire is suitable, for larger and more stable shapes and lettering the 2mm wire is best.

DE Kunstleder ist eine modische Alternative zu Echtleder. Da es sich leicht schneiden, nähen und kleben lässt ist es vielseitig einsetzbar: ob für Taschen, Modeaccessoires oder Dekorationen.
IT La similpelle è un'alternativa trendy al cuoio vero. Essendo facile da tagliare, cucire e incollare, è molto versatile: può essere usata sia per borse, che per accessori o altre decorazioni.
EN Faux leather is a fashionable alternative to real leather. Since it is easy to cut, sew and glue, it is very versatile: whether for bags, accessories or decorations.
FR Le similicuir est une alternative tendance au cuir véritable. Comme il est facile à couper, à coudre et à coller, il est très polyvalent : il peut être utilisé pour des sacs, des accessoires ou d'autres décorations.

DE Das Pouring Medium ist ein Acryl-Hilfsmittel für Gießanwendungen das pur oder in beliebiger Menge mit Acrylfarben gemischt anzuwenden ist. Es verbessert die Verlaufseigenschaften, vermindert die Rissbildung, ohne dass die Acrylfarbe an Farbtiefe verliert. Trocknet wasserfest, glänzend und transparent auf.
IT Il Pouring Medium è un medium fluido per colori acrilici "a colata" da utilizzare a sé stante oppure da mescolare a piacere con colori acrilici. Migliora le proprietà di colaggio e diminuisce le crepe senza che i colori acrilici perdano d'intensità. Diventa resistente all'acqua, lucido e trasparente una volta asciutto.

DE Rapswachs ist im Gegensatz zum herkömmlichen Paraffinwachs, umweltfreundlicher und biologisch abbaubar. Kerzen aus Rapswachs verbreiten, wenn überhaupt, nur einen sehr leichten, natürlichen Duft und sind daher besonders für Allergiker geeignet.
IT A differenza della tradizionale paraffina, la cera di colza è più ecologica e biodegradabile. Le candele a base di cera di colza diffondono, seppur minimamente, solo un profumo molto leggero e naturale e sono quindi particolarmente adatte a chi soffre di allergie.
ENG In contrast to conventional paraffin wax, rapeseed wax is more environmentally friendly and biodegradable. Candles made from rapeseed wax emit, if at all, only a very light, natural scent and are therefore particularly suitable for allergy sufferers.
FR Contrairement à la cire de paraffine traditionnelle, la cire de colza est plus écologique et biodégradable. Les bougies en cire de colza ne dégagent qu'un très léger parfum naturel, voire aucun, et conviennent donc particulièrement bien aux personnes allergiques.

DE Kamihimo ist ein japanisches Handwerk, bei dem zusammengeklebte Papierschnüre geflochten werden. Daher der Name „Kami“ (=Papier) „Himo“ (=Schnur). Aufgrund seiner Robustheit und Reißfestigkeit wurde es meistens zum Pakete zusammenzuschnüren angewendet. Heute erfreut sich das Handwerk mit zunehmender Beliebtheit im Bastelbereich, da die Papierbänder zum Flechten von dekorativen und nützlichen Gegenständen eingesetzt werden können.
IT Il Kamihimo è un'arte giapponese che consiste nell'intrecciare strisce di carta. Da qui il nome "kami" (=carta) "himo" (=corda). Grazie alla sua robustezza e resistenza allo strappo, in passato veniva utilizzato soprattutto per legare insieme i pacchi. Oggi, quest'arte gode di una crescente popolarità nel settore dei lavori creativi, poiché i nastri di carta possono essere utilizzati per tessere oggetti decorativi e utili.
ENG Kamihimo is a Japanese craft in which paper straps are woven and glued together. Hence the name "kami" (=paper) "himo" (=cord). Due to its robustness and tear resistance, it was mostly used to tie parcels together. Today, the craft is enjoying increasing popularity in the handicraft sector, as the paper ribbons can be used to weave decorative and useful objects.
FR Le kamihimo est un artisanat japonais qui consiste à tresser des ficelles de papier collées ensemble. D'où le nom de "kami" (= papier) "himo" (= ficelle). En raison de sa robustesse et de sa résistance à la déchirure, il était généralement utilisé pour ficeler des paquets. Aujourd'hui, cet artisanat est de plus en plus apprécié dans le domaine du bricolage, car les rubans de papier peuvent être utilisés pour tresser des objets décoratifs et utiles.

Siegelpistole | Pistola a caldo per ceralacca | Sealing wax gun | Pistolet cire à cacheter

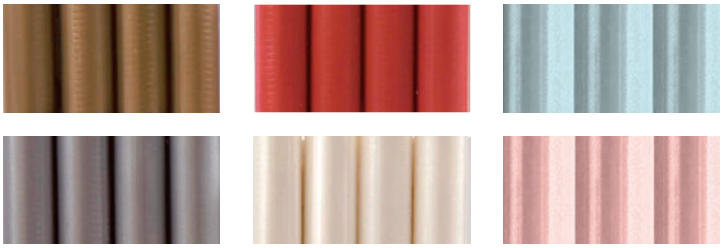

DE Zuvor den Stempel auf einem Eiswürfel kühlen. Nachdem das Siegellackstäbchen in die Pistole eingeführt worden ist, diese aufwärmen. Den Abzug mehrmals drücken um ein Wachsplätzchen zu erhalten, der Durchmesser sollte etwas grösser als der Stempel sein. Den Stempel abwischen, danach auf den warmen Wachs drücken. Etwa 30 Sekunden warten, dann sanft entfernen indem man den Griff leicht hin und her bewegt.
IT Raffreddare il timbro con dei cubetti di ghiaccio. Inserire lo stick di ceralacca nella pistola a caldo e accenderla. Premere il grilletto più volte finché la ceralacca fusa fuoriesce nella quantità necessaria (deve superare di poco il diametro del timbro). Asciugare il timbro e premerlo sulla ceralacca ancora calda. Aspettare ca. 30 secondi e poi staccare il timbro delicatamente.
EN First cool the stamp with an ice cube. After you put the sealing wax stick into the pistol please warm it up. To get a wax leaflet you have to use the trigger of the pistol several times. The diameter of the wax leaflet should be a little bit bigger than the stamp. Wipe the stamp and push it on the warm wax, wait 30 seconds then remove the stamp gently.
FR Refroidir préalablement le cachet dans de la glace. Préchauffer le pistolet après avoir inséré un bâton de cire. Quelques gouttes de cire peuvent couler. Presser la gachette plusieurs fois pour libérer une pastille de cire d'un diamètre légèrment. Essuyer le cachet, puis l'appliquer sur la cire chaude. Attendre 30 secondes avant de retirer dêlicatement le cachet en le faisant basculer.
