Schritt 1: Grundieren Sie in ein oder zwei Schichten mit Malgrund, lassen Sie diese Grundierung gut trocknen.
Schritt 2: Tragen Sie die Eisengrundierung in zwei oder mehreren Schichten auf und lassen Sie den Farbauftrag trocknen.
Schritt 3: In die letzte, noch nicht ganz trockene Farbschicht mit Hilfe eines Schwämmchens das Oxidationsmittel auftupfen, bei Raumtemperatur trocknen lassen und den Vorgang wiederholen. Ca. 20 - 30 Minuten nach dem ersten Auftrag des Oxidationsmittels setzt die Rostbildung ein und hält dann über mehrere Stunden an. Dabei ändert die Oberfläche entsprechend der Rostbildung laufend ihr Aussehen.

1. Stendere uno o due strati di prodotto base e lasciare asciugare molto bene.
 2. Dare sopra una o più mani di prodotto ferruginoso e lasciare asciugare.
 3. Infine sul prodotto non completamente asciutto applicare l'ossidante, tamponando con l'aiuto di una spugnetta. Lasciare asciugare a temperatura ambiente e ripetere l'operazione. La formazione della ruggine inizierà dopo ca. 20 - 30 min. dalla prima applicazione e continuerà per alcune ore. In questo modo si vedrà la superficie trattata cambiare gradualmente aspetto.

Step 1: Prime the surface with one or two coats with Design Impressions - Primer and let dry well.
Step 2: Apply the Iron Metallic Surfer in one or more coats. You may use a brush or a palette knife. Let dry at room temperature (around 20° C).
Step 3: Apply a coat of Oxydant as long as the Iron Metallic Surfer is still wet, let dry at room temperature and repeat the procedure. The rust will start to develop 20 - 30 minutes after the first application and will continue for several hours. During this time the look of your project will change permanently.

1. Appliquez la première couche du fond sur votre pièce à fabriquer et laissez la secher.
 2. Appliquez la peinture une fois, laissez la secher et répétez ce processus.
 3. La couche dernière devait être un peu humide quand vous appliquez une couche d'oxydation. Laissez la secher à température ambiante et répétez ce processus. La rouille se developpera dans les 20 minutes à 24 heures. Pendant cette période l'apparence de votre projet va varier constamment.
